

# ABOUT ED

[Erectile Dysfunction]

According to statistics in Japan, 18 million people are suffering from ED (Erectile Dysfunction) including those with light symptom.

25% of 40s, 33% of 50s and 50% of 60s are troubled with this phenomenon.

The cause is their life style having stress, irregular meal, lack of exercise, excessive alcohol drinking, heavy smoking etc for many years.

The lifestyle-related diseases such as diabetes, high blood pressure, dyslipidemia cause poor blood flow bringing about risk of suffering from ED.

Our product has been created to solve these lifestyle-related disorders and to improve everyone's life power and particularly for pleasant marital relations.

And that product was named "JUN".

**“純” JUN**  
(It means "PURE")  
Green tea powder processed food.
